

ISO27k Toolkit

The **ISO27k Toolkit** is a collection of generic ISMS-related materials contributed by members of the [ISO27k Forum](#). We are very grateful for the generosity and community-spirit of the donors in allowing us to share them with you, free of charge. The materials have been donated by individuals with differing backgrounds, competence and expertise, working for a variety of organisations and contexts. They are models or templates, starting points if you will. *Your* information risks are unique, so it is incumbent on you to assess and treat your risks as you and your management see fit.

None of the ISO27k Toolkit materials constitute legal advice, and – as provided – they are unlikely to be suitable or sufficient for any organisation without substantial customisation and supplementation.

The toolkit’s “skeleton policies”, for instance, are generic and *deliberately* minimalist, the bare bones, basic foundations or suggestions from which to construct custom policies and determine which information security controls are appropriate for *your* organisation’s Information Security Management System. See [ISO/IEC 27001](#), [ISO/IEC 27002](#), other standards and [the SecAware ISMS toolkits](#) for further guidance and additional templates.

We *strongly* advise consulting [competent specialists](#) when designing, implementing, reviewing/auditing or relying on a third party’s ISMS, or indeed any other way of managing information risk, security, governance *etc.* In particular, there are numerous legal, regulatory, contractual, technical and ethical requirements or expectations in this area. We can help you navigate the minefield safely!

Terms and conditions of use

Please read and respect any copyright notices within the individual files.

Some are covered by the [Creative Commons Attribution-Noncommercial-Share Alike license](#): you are welcome to reproduce, circulate, use and create derivative works from these materials, *provided* that:

- a) they are not sold or incorporated into commercial products;
- b) they are duly attributed to the [ISO27k Forum](#) at [ISO27001security.com](#); and
- c) *if* they are published or shared, derivative works are shared under the same terms.
